PROFESSIONAL SUMMARY

MCA graduate and Python Developer Intern with hands-on experience in React.js, JavaScript, HTML, and CSS, gained across a live internship and multiple full-stack projects. Comfortable building responsive, component-based frontends and connecting them to REST APIs and relational databases. Strong problem-solving and logical thinking skills, with a keen interest in modern web technologies and UI/UX, and eager to grow into React.js/Next.js development as a Software Developer – Fresher.

TECHNICAL SKILLS

Frontend React.js, JavaScript, HTML5, CSS3; learning Next.js
Backend Flask, REST APIs, SQLAlchemy ORM
Languages Python, Java, PHP, JavaScript, C
Databases MySQL, MongoDB, SQLite
Tools Git, GitHub, VS Code, Postman, MySQL Workbench
Concepts OOP, DBMS, CRUD Operations, Responsive Design

EXPERIENCE

Python Developer Intern June 2026 – Present
Zentrix Technology *Remote*

Building responsive frontend interfaces using React.js, HTML, CSS, and JavaScript for ERP applications, while developing backend modules with Python, Flask, and SQLAlchemy ORM. Designing REST APIs, integrating MySQL databases, and testing APIs using Postman to ensure smooth frontend-backend communication.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026
Rajiv Gandhi Institute of Technology, Kottayam — APJ Abdul Kalam Technological University *CGPA: 7.51*

Bachelor of Computer Applications (BCA) 2021 – 2024
Marian College Kuttikkanam Autonomous, Idukki — Mahatma Gandhi University, Kottayam *72.20%*

PROJECTS

TextGuard – AI-Based Text & Plagiarism Detection System

Developed an AI-powered web application for detecting AI-generated text and semantic plagiarism using transformer-based NLP models. Integrated Sentence-BERT for semantic similarity, DistilGPT2 for AI text detection, and T5 for text processing while developing a Flask-based web interface with user authentication and result history.

Tech Stack: Python, Flask, PyTorch, Sentence-BERT, DistilGPT2, T5, SQLite, HTML, CSS, JavaScript

EcoCollect – Smart Waste Management System

Designed and developed a multi-role web platform where residents submit waste pickup requests and administrators assign field agents and track request status in real time. Implemented a relational database schema in MySQL to manage users, requests, and agent workflows end to end.

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

BloodLink – Blood Donation Management System

Built a full-stack web application for donor registration, blood group-based matching, and request management, reducing the manual effort involved in connecting donors to recipients. Architected the backend API in Node.js with a MongoDB database to handle dynamic donor queries and requests.

Tech Stack: Node.js, MongoDB, HTML, CSS, JavaScript

VoteEase – Secure College Voting System

Developed a tamper-resistant online voting system featuring authenticated user login, role-based access control, and automated real-time vote tallying. Implemented safeguards to eliminate manual counting errors and ensure one vote per verified user.

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

CERTIFICATIONS

- Python for Data Science – IBM
- MERN Full Stack Project – ICT Academy of Kerala
- Database Management System – NPTEL, IIT Kharagpur (SWAYAM)
- Microsoft Office Specialist (Excel)

ACHIEVEMENTS & LEADERSHIP

- NAAC Accreditation Team Coordinator – contributed to A++ reaccreditation at Marian College Kuttikkanam
- Presented seminar on “Enhanced IoT Security: Privacy-Preserving Federated Learning for Real-Time Intrusion Detection”
- Junior Red Cross Cadet (2015–2019)
